

KRIS KOFLER

Software Engineer & IT Enthusiast

I am software engineer with strong tech problem solving skills, often combining multiple roles from developing websites and web applications to improving internal infrastructure systems.

FULL-STACK WEB DEVELOPER

Climb Online 2020 — present

Developer and technical problem solver at fast growing and dynamic digital marketing agency.

- › Build and ship high-quality websites, webapps and other digital solutions for clients using web technologies
- › Build bespoke web applications and deploy tooling for internal use, software like booking systems, IT assets management, multi-step request forms, etc
- › Create various scripts and apps with Node.js and Python, including custom frameworks, project builders, data converters, adaptors, web scrapers, and many more
- › Implement tooling and create documentation for Web Dev and IT to help technical and non-technical departments share knowledge and collaborate
- › Develop bespoke integrations for various third-party tools using REST-API's, web-hooks and services like Pipedream and Zapier
- › Work with technical SEO to implement its best practices to new and existing projects
- › Work alongside project managers, designers and other developers to create refined products from creative concepts

- › Manage Linux based firewall with iptables and fail2ban
- › Maintain local backup system using Bash, Samba, Cron, rsync and Duplicati
- › Manage local DNS with Bind 9
- › Support TouchTime clocking, CCTV, and Avaya IP-Office VoIP systems

IT TECHNICIAN

RDC 2015 — 2016

Tech bench worker in a large IT circular services management company, who started as a regular technician and was promoted to work with complex server systems within few months.

- › Diagnose, configure, refurbish server and networking equipment to ensure optimal performance and compliance with industry standards, including firmware updates, data wiping, component testing and replacement
- › Test hardware by following strict procedures
- › Wipe storage devices with Blancco
